

LAKAVATH JYOTHSNA

* HYDERABAD,INDIA # lakavathjyothsna2005@gmail.com | +91 8143614914

ABOUT ME

"Highly motivated and detail-oriented aspiring web developer with a strong foundation in HTML, CSS, and JavaScript. Eager to apply learned skills and contribute to dynamic web development projects. Possesses a strong desire to learn and grow in a fast-paced environment."

EDUCATION

Bachelor of Technology(B-TECH)

2022-2026

Marri Maxman Institute of Technology and Management,Dundigal,Hyderabad

- CGPA: 8.35/10.0
- Related coursework: Artificial intelligence and Machine learning

Higher Secondary Certificate (HSC)

2020-2022

Telangana Tribble Welfare Residencial Upgrade Junior college

- Marks: 776/1000
- Related coursework: Mathematics,Physics,Chemistry(MPC)

Matriculation

2020

Zilla Parishad High School(Girl's) kowdipally,Medak,Telangana

- GPA: 9.7/10

SKILLS

- HTML
- CSS
- FIGMA

Languages

- Python Basics
- Java Basic

PROJECTS

CROP YIELD PREDICTION BASED ON INDIA AGRICULTURE USING MACHINE LEARNING AND DEEP LEARNING

- India depends heavily on agriculture, and knowing how much crop will be produced each season is very important for farmers, the government, and the economy.
- This project uses modern technology like Machine Learning (ML) and Deep Learning (DL) to predict crop yields more accurately.
- Crop yield prediction using **machine learning and deep learning** helps farmers and the government know how much crop will grow before harvest. In India, this is very useful because farming depends a lot on weather, soil, and water.
- With these technologies

Brain Tumor Detection and Classification using Artificial Intelligence

- Brain tumors are a critical health concern worldwide, often requiring accurate and timely diagnosis for effective treatment planning.
- Traditional methods of tumor detection involve manual inspection of medical images by radiologists, which can be time-consuming and subjective. This paper proposes a novel approach for brain tumor detection and classification using AI.
- Keywords: Brain Tumor (BT), MRI-Images, CT, IP, X-ray

INTERNSHIPS

Internship Programme On Deep Learning

- **Project Experience:** Describe specific deep learning projects you worked on during the internship, including the problem statement, approach, and outcomes.
- **Skills Acquired:** List the deep learning frameworks, tools, and techniques you learned and applied during the internship (e.g., TensorFlow, PyTorch, CNNs, RNNs).
- **Technical Skills:** Highlight your proficiency in programming languages like Python, and relevant libraries like NumPy, Pandas, and scikit-learn.

Embedded System Developer Virtual Internship

- **Design and develop embedded systems:** Create hardware and software solutions for various applications.
- **Program microcontrollers:** Write code for microcontrollers using languages like C, C++, and Python.
- **Collaborate with teams:** Work with cross-functional teams to integrate embedded systems into larger projects.

AWS Virtual Internship

- **Learn AWS services:** Explore various AWS services, such as EC2, S3, Lambda, and more.
- **Work on projects:** Develop and deploy projects using AWS services, such as web applications, data analytics, or machine learning models.
- **Collaborate with teams:** Work with cross-functional teams to design, develop, and deploy AWS-based solutions.

CERTIFICATIONS&AWARDS

- Certificate of Virtual Internship Embedded System Developer
- Certificate of Internship programme on deep learning
- Certificate of Virtual Internship program on AI/ML
- CLA: Programming Essentials in C Certificate
- Online webinar participant in Free Webinar on Roadmap to MNC Jobs on August 25, 2024
- Certificate of Volunteership [LASMID]
